29. **SCHEDULE FOR PERFORMANCE OF WORK:**

All work described in these specifications shall be completed with reasonable promptness. As used in this Section, the State of Delaware shall be the sole judge of the term "reasonable". 30. **TIME OF PERFORMANCE:**

The services of the Contractor are to commence after receipt of a purchase order, and shall be undertaken and completed in such sequence as to assure their expeditious completion in the light of the purposes of the contract, but in any event all of the services required hereunder shall be completed no later than the time periods set out in any schedule contained in the project Scope of Work. Any such schedule shall be maintained by the Contractor unless amended, in writing, by both parties.

APPENDIX A
SCOPE OF WORK DETAILS

The Delaware State Police, hereinafter referred to as the State Police, wishes to purchase digital video recorders for use in their patrol vehicle fleet and requires the delivery, installation and training to take place within 90 days after the award of the contract. The State Police operate from a decentralized command structure having eight separate troops throughout the state. Four troops are located in New Castle County, one in Kent County not including our HQ complex, and three troops operate in Sussex County. Troopers working patrol duty work on a twelve hour shift and rotate between the two 12-hour time frames on some predictable frequency. Troopers are assigned a specific vehicle and generally do not share a vehicle with another officer. On average, vehicles remain in the patrol fleet for at least three years but could remain longer depending on fiscal or operational constraints.

The Vendor(s) shall provide material specified and all labor necessary to satisfy the Delaware State Police's need for the installation of equipment as described herein. Each proposal must contain a detailed description of how the offeror will install the equipment as outlined in this RFP; to include the vendor requirements, warranty, and calibration requirements. In addition, each offeror must detail the warranty of work and described the terms of the warranty. This part of the proposal may also include descriptions of any enhancements or additional services or qualifications the offeror will provide that are not mentioned in this RFP. The purchase and install will be implemented in phases and this RFP will focus on equipping Troop 3 and 6.

Your proposal should include any permissible options for the State Police to perform the installation of your product on their own. If permissible, what considerations/conditions impact such a decision, e.g., effect on warranty, training required, certification by manufacturer and or offeror, etc. This should not be considered "decided" by the State Police; it is merely an option they also wish to consider and need to know what may be required of them to exercise that option."

Section 1:

Operational Deployment

The State Police intend to install a digital video recorder in every patrol vehicle it deploys; however, this deployment is contingent upon the financial resources allocated to this project. We anticipate outfitting approximately 400 vehicles with this technology; however, the final award may be for fewer recorders depending on their final cost. The camera functionality, clarity, and ease of use must meet or exceed the requirements as defined in Section 5. Each vendor must include their pricing structure for the in-car cameras systems to reflect the initial purchase cost and annual maintenance costs in out years for the expected life cycle of 4 years. List the price breaks for annual maintenance by years as structured by the company.

Section 2:

Infrastructure

The State Police manages its technology resources from a centralized server location as a preferred business operation. Each troop or barracks is connected to the State Network by TLS connectivity providing a bandwidth of 10 Mb/s. Two primary storage sites are equipped with fiber providing a 100 Mb/s transfer rate. These two sites are part of the network topology for centralized data storage and management for this project. Vendors are required to provide a design structure for review that includes centralized storage and replication/backup on site or off-site. There are no servers at the individual troops. In this design, it is anticipated that new server(s) at the Troop location will be needed for initial data capture at defined times. The transfer from the patrol car to the server should be conducted via a secure wireless access point and should be seamless to the Trooper. The present access points will be replaced in this project. Vendors are required to provide documentation for a non-proprietary access points and proprietary access points; non-proprietary equipment is preferred. The systems defined need to utilize a secure data transfer process. The data from the Troop server will be transferred to a central server at a location defined by DSP. Vendors are required to provide detailed documentation about the size of the video from capture to transfer throughout the infrastructure in order to determine storage and data transfer across the State network; provide an electronic calculation tool if available. Vendors will need to provide technical engineers who can work with DSP and State network staff to carefully review the requirements as this is a core function for the success of this project. The recordings and related data must be transferable across the State network at non-peak times defined by the State without impact to the network.

Vendors must clearly define the capture rates and compressions rates for network evaluation purposes. Patrol cars operate on the Verizon Cellular EVDO network for wireless communications. Servers are required to be DELL servers and related equipment/devices must be compatible. An explanation of recommended equipment is required to support that choice of equipment by the vendor. The drawing located on the next page (Figure 1) depicts the general communications and resources for the State Police.

STATE OF DELAWARE
Office of Management and Budget
Government Support Services

Figure 1:
DSP General Communications

Section 3:

Data Transfer to a Central Storage/Management Location

This project design must include a database backend management system. The digital recording would be downloaded from the DVR system in a patrol car to a server at the site by a defined electronic process. At a prescribed time, the data can be electronically copied off site to a central server located at a State Police site residing on the State network. It is important that the display/software used by the officers is simple to view, review and access for recording and transferring recordings/data. New Servers and Wireless Access Points are required in this scope of work. In the scope of this project each vendor needs to define these equipment requirements. Access to a simple user friendly web client from a desktop computer is the intended retrieval application to access and manage the stored data. Detailed documentation of the data transfer process and file size is critical. The attached drawing (Figure 1) depicts the general communication resources for the State Police.

It is recognized that the final deployment is impacted by financial constraints. Each vendor is required to provide a detailed visual design along with system requirements that include compression rates and management of the recordings for storage and retrieval for court purposes to explain how the stored recording is the same as the captured recording. Each vendor must provide information about the recording and data file structure and the database software used in the application; i.e. SQL, Oracle etc; SQL is preferred. Provide the available systems in a comparative summary format with projected costs and estimated storage needs for the data flow process from capture to storage, replication and archiving. Highlight any vendor specific product enhancements that would be important in the evaluation of the product line.

Section 4:

Back End System Management

A scalable data storage management system that offers ability to capture digital and non-digital data is the system of choice. Next to the quality of the video capture and functionality, this is one of the most important implementation areas for DSP in the procurement process. While certainly there are some differences in digital video recorders, for the most part, these devices offer standard features and provide similar functions and characteristics. The ability and capabilities of the video management back end tools or software is what we believe will set your system apart from any other. We are looking for a system that is reliable, robust, user friendly, secure decentralized access/retrieval/monitoring/classifying and supervisory review capabilities, while still providing administrator controls and overall system security and integrity. If we are forced to sacrifice any features due to budgetary constraints within the project, it will not be focused on this component of the overall system. The server and large storage equipment should be DELL systems. Sufficient hours of training to IT staff and support during and after the implementation must be explained. The central storage system is required to meet network requirements to function within a secure DMZ with application access (web preferred) by users at off-sites to conduct daily business requirements of reviewing information, preparing media for court, etc.

Vendors offering a solution should expect at a minimum that DSP will likely retain between 1.5 and 2.0 hours of video captured from a 12 hour shift per officer per day. The specifications for the servers and attached storage devices must be defined by processing speed, scalable storage, and archiving/backup or replication. All required software licensing must be identified. As best possible, the system design must reflect projections for storage requirements for recording / data retention with archiving recommendations and replication/backup solutions for servers that will be in use for approximately four years; if possible recommend disaster recovery solutions within

STATE OF DELAWARE
Office of Management and Budget
Government Support Services

the scope of the hardware and software design. It is suggested that most recording/data will be retained for two years and some data could be retained indefinitely. Vendors are asked to define how their system can provide retention triggers that can be Agency defined. Vendors are asked to provide reasonable projection for storage for the equipment defined; scalability is important. The annual software maintenance and equipment maintenance must be clearly defined to include levels of support and related costs. The project has a defined funding source. It is recognized that the actual number of cameras/users to be defined will depend upon the actual costs to define the backend system needs. Vendors should be able to provide recommendations based on present customers with similar agency size and defined funding. It should be presumed that the backend system be designed to support an adequate number of cameras/users in the patrol cars in this initial deployment with anticipated growth in future funding.

As a criminal justice agency we are called upon to provide testimony and evidence in Delaware and Federal Courts. In doing so we must demonstrate direct chain of custody, evidentiary controls, and without fail provide and be able to demonstrate and defend a system that is free from manipulation, alteration, or tampering. It cannot be stressed enough that this piece of our anticipated system will be a major focus of our deliberations as to the final award.

Vendor must clearly define what is included in the standard enterprise application functionality. If there are items which are not included in the functionally vendor must list and clearly define what is considered customized and provide detailed information, including cost for each.

Section 5:

Applicable Standards

The State Police intends to ensure that prospective bidders digital video recording systems will, at a minimum, meet the *In-Car Video Camera Systems Performance Specifications: Digital Video Systems Module* prepared by the International Association of Chiefs of Police (IACP) as outlined in their *Digital Video Systems Minimum Performance Specifications Document Version 14 dated 11/21/2008*.

Each vendor submitting a bid will be required to also submit a notarized certification that the product they are offering meets the minimum specifications outlined in this document. A simple statement of conformance, signed by a duly authorized company representative and notarized by a notary public must accompany your response. Bidders should compose this acknowledgement document on your own. Should any potential offeror take exception to any specification outlined in the *Digital Video Systems Minimum Performance Specifications Document Version 14 dated 11/21/2008*, they should note that exception and request a waiver stating the reason for the request and the degree to which their product does not meet the stated specification.

Any bid not accompanied by such a notarized declaration will be rejected.

Bidders are required to submit all technical specifications for all products, devices and equipment that are part of your proposed solution along with any clarifying graphical depictions of the end to end data flow for evaluation by the selection team.

Employees of the successful offeror who will be working on the project will be required to submit to and be

The State Police deploys DELL servers, desktops, and laptops computers and reserves the right to acquire on its own, independent of this process, any necessary servers for the storage of our digital video evidence.

Section 6:

Procedural Process

Notifications will be sent to selected vendors to meet with State Police personnel to present their RFP in person. Vendors selected for Oral Presentations must provide the following items in advance of their presentation.

- The identity of the customers who have purchased the same products or previous versions that are the subject of this solicitation. Vendors should provide the customer's name, address, city, state, zip code, phone number, and a contact name.
- The names of all persons, their job titles, and areas of responsibilities for any employee or contractor who will be working on the project if awarded the bid.
- A statement indicating any lawsuits or legal actions against the bidder for any allegation(s) arising from doing business regardless of the issue or state of occurrence.

From these interviews the assessment team will investigate and visit if possible current jurisdictions deploying the specific vendor's product for evaluation.

After the business of the assessment team is completed a numerical rank ordering shall be produced of the results of the assessment teams' voting consistent with the procedures of the State of Delaware bidding proposal established process. The resultant award winner will be notified and contract negotiations will begin until a contract signed.

Definitions

Minority and/or Women Business Enterprise

A Minority and Women Business Enterprise is a business that is at least 51 percent owned, controlled and actively managed by minority and/or women group members who are United States citizens or persons lawfully admitted to the United States for permanent residence.

The business must be a for-profit business and currently be performing a useful function.

Minorities – United States citizens or permanent residents who are African Americans, Asian/Pacific Americans, Hispanic Americans, Native Americans, Subcontinent Asian Americans, or as defined herein:

African (Black) Americans. All persons having origins from any of the Black groups of Africa and all persons having origins in any of the original peoples of the Cape Verde Islands.

Asian/Pacific Americans. All persons having origins from any of the original peoples of the Far East, Asia, or the Pacific Islands, including China, Japan, Korea, Samoa, Philippine Islands, and Hawaii. Guam, the U.S. Trust Territories of the Pacific or the Northern Marianas.

Hispanic Americans. Persons having origins from any of the Spanish-speaking peoples of México, Puerto Rico, Cuba, Central or South America, or the Caribbean Islands.

Native Americans. All persons having origins from the original peoples of North America and who are recognized as Native Americans by a tribe or tribal organization.

Subcontinent Asian Americans. All persons whose ancestors originated in India, Pakistan or Bangladesh.

Certification - A determination by the OMWBE that a for-profit business entity is a Minority Business Enterprise (MBE) and/or Women Business Enterprise (WBE).

Definitions

Ownership

The minority or woman ownership interest in the firm must be real, substantial and continuing and shall go beyond the pro forma ownership of the business as reflected in its ownership documents. The minority and women owners shall enjoy the customary incidents of ownership and shall share in the risks and profits commensurate with their ownership interest as demonstrated both by an examination of the substance and form of arrangements.

Control

Control will be exemplified by possession of the requisite knowledge and expertise to run the particular business. Control includes the authority to determine the direction of a business, including but not limited to capital investments and all other financial transactions; property acquisitions; day-to-day decisions; contract negotiations; legal matters; selection and hiring of officers, directors, and employees; operating responsibility; cost-control; income and dividend matters; and the rights of other shareholders or partners.

The minority and/or women owners must hold the highest officer position in their companies, example chief executive officer or president.

The minority and/or women must demonstrate that they possess the experience, expertise and knowledge to operate their particular types of business.

Expertise limited to office management, administration, or bookkeeping functions unrelated to the principal business activities of the company is insufficient to demonstrate control. Women and/or minority owners must also verify that they hold any licenses or certification required by the type of business in which they are engaged.

Definitions

Minority Business Enterprise (MBE) - A for profit business in which at least 51% of the beneficial ownership interest and control are held by a minority or minorities. In the case of a corporation, minorities must hold at least 51% of voting interest.

Minority & Women Business Enterprise (MWBE) - A for-profit business in which at least 51% of beneficial interest and control is held by minority women or by an equal combination of minorities and women. In the case of a corporation, women and minorities must also hold at least 51% of voting interest.

Women Business Enterprise (WBE) - A for-profit business in which at least 51% of beneficial interest and control is held by women. In the case of a corporation, women must also hold at least 51% of the voting interest.

Useful Business Function

A useful business function is one, which results in the provision of materials, supplies, equipment or services to consumers in the State. A business acting as a conduit to transfer funds to a non-minority business does not constitute a useful business function unless doing so is a normal industry practice.

Benefits of Certification

Current certified minority and/or women owned firms are eligible to be listed in the State of Delaware Directory of Minority and Women Owned Businesses which is circulated to all state and local government agencies.

Recertification

At the ends of three years from original certification date, firms must submit the recertification affidavit to remain actively visible in the State of Delaware's Minority and/or Women Business Enterprise database.

- a) Belong to a minority group: African Americans, Asian/Pacific Americans, Hispanic Americans, Native Americans, and Subcontinent Asian Americans.
(Please reference above definitions)
- b) At least 51 percent owned, controlled and actively managed by minority group members or by women.
- c) Serving a for profit business with "useful business functions."
(Please reference above definitions)

Reasons for denial *(please note the below may include but not be limited to)*

- a) A business located in a state other than Delaware must first obtain state-level certification in its home state, if such certification is available. "Home state" is defined as the state the company's headquarters are located.
- b) All securities, which constitute ownership and/or control of a corporation for the purpose of establishing it as a MWBE, must be held directly by minorities or women. No securities held in trust, or by a guardian for a minor, shall be considered as held by a minority or women in determining the ownership or control of a corporation.
- c) If the business operations do not reflect the ownership shown on paper.

- d) Firm is not a for-profit business
- e) Firm has provided false or misleading information
- f) Control will not be deemed to exist in cases of simple majority or absentee ownership, or when a non-minority/non-female owner or employee of the firm is disproportionately responsible for its operation.
- g) The firm shall not be subject to any formal or informal restrictions through, for example through, by-laws provisions, partnership agreements, or charter requirements for cumulative voting rights or otherwise that prevents the minority and women owners, without the cooperation or vote of any owner who is not a minority or women for making a business decision of the firm.
- h) If the owners of the firm who are not minorities or women are disproportionately responsible for the operation of the firm, then the firm is not controlled by minorities and shall not be considered as MWBE within the meaning of the definition.
